Manual Cleaning Material: OXAPA Cleaner HRM 04

cleaning material	pH	basic material	dilution	cleaning type	price EUR/ltr 100% concentration
OXAPA Cleaner HRM 04	7	hydrocarbon	prohibited	cleaning by hand	95

OXAPA Cleaner HRM 04 is developed for effective cleaning by hand of polished or coated optical elements in clean room conditions under ventilation. It is suitable for application for all glass types and can be used together with cleaning swabs.

OXAPA Cleaner HRM 04 provides reduced static contamination of the optical surface before coating, what increases the damage threshold of the optical element after the coating.
